

NIKHIL SAI KENGURI

Software Developer | B.Tech AI & ML | Full-Stack JavaScript Developer
+91 7386552846 • sainikhil1146@gmail.com • [LinkedIn](#) • [Portfolio](#) • [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech AI & ML student (CGPA 8.48) with hands-on Full-Stack JavaScript experience — currently building and contributing to production-grade MERN stack applications. Skilled in React, Node.js, Express.js, MongoDB, and REST API design. Comfortable with the complete software development lifecycle: from component architecture and database modelling to deployment, Git workflows, and collaborative code reviews. Eager to contribute to a software development team and build scalable, real-world products.

TECHNICAL SKILLS

Frontend: JavaScript (ES6+), React.js, HTML5, CSS3, Responsive Design, Component Architecture
Backend: Node.js, Express.js, REST API Design & Integration, Python, Flask
Databases: MongoDB, SQL, Query Optimisation, Joins & Aggregations, Data Modelling
Dev Tools: Git, GitHub, VS Code, Postman, npm, Open-Source Collaboration, PR & Code Review workflows
Programming: JavaScript, Python, Java, C | Core: OOP, Data Structures, Problem Solving
AI / Productivity: Machine Learning (basics), AI-assisted development workflows, Prompt Engineering
Hardware / IoT: Arduino, Embedded Systems, Sensor Integration

EXPERIENCE

Full-Stack Open-Source Developer — VLED Lab, IIT Ropar Jun 2026 – Present
CrowdFAQ | MERN Stack Web Application (React/Vite · Node.js · Express · MongoDB)
Status: Ongoing Internship — Summer 2026

- Developing features on a production-grade MERN stack codebase; resolving real GitHub issues with commits merged to the main repository.
- Practising full software delivery workflow: Git branch strategy, pull requests, code reviews, and collaborative issue triaging.
- Building and consuming **REST APIs with Express.js and integrating MongoDB data models** — end-to-end full-stack feature work.
- Applying React component patterns and state management in a real codebase alongside senior developers.

PROJECTS

CrowdFAQ — Full-Stack Community FAQ Web Application Jun 2026 – Present
Open-Source Contributor | React/Vite · Node.js · Express.js · MongoDB · REST APIs · Git

- Contributed frontend UI components in React and backend API routes in Express.js to a live multi-user FAQ platform.
- Implemented real-time data operations between React frontend and MongoDB via RESTful Express endpoints.
- Followed production-ready practices: feature branching, atomic commits, pull request reviews, and issue tracking on GitHub.

Smart Crutch — Healthcare IoT Dashboard & Backend System 2025 – Present
Project Lead | Python/Flask · HTML/CSS/JS · REST APIs · Arduino · Sensor Integration
Status: Prototype Building Phase

- Architected and built a full-stack IoT system: Python/Flask REST API backend ingesting live sensor data from Arduino hardware.
- Designed and developed a real-time HTML/CSS/JavaScript dashboard that visualises patient weight distribution during post-injury rehabilitation.
- End-to-end ownership: hardware integration, backend API design, database storage, and frontend data visualisation.

Funding Status: [Applied for IEEE EPICS International Student Project Funding — currently under review.](#)

GridSense AI — Energy Analytics Web Platform 2025
Solo Developer | JavaScript · Python · REST APIs · Data Visualisation

- Built an AI-powered smart energy management web platform with analytics dashboards, real-time IoT data feeds, and automated alerting; developed Python backend REST APIs and frontend data visualisation components.

EDUCATION

Bachelor of Technology (B.Tech) – AI & ML Expected May 2028
Kalasalingam Academy of Research and Education, Madurai • CGPA: [8.48 \(4th Sem\)](#)
Intermediate (Class XII) – MPC Completed: 2024
Sri Chaitanya Junior College, Kurnool • Percentage: 94.2%
Secondary School (Class X) – State Board Completed: 2022
Z.P.H. School, Enumuladoddi • Percentage: 84% ([School Topper](#))

KEY ACHIEVEMENTS

- IIT Ropar Open-Source Internship** — Selected as Full-Stack developer contributor for VLED Lab's Summer 2026 internship on CrowdFAQ, a production-grade MERN web application.
- Healthcare Tech / IEEE EPICS** — Built full-stack IoT dashboard (Python/Flask backend + JS frontend); [applied for IEEE EPICS international student project funding — decision pending.](#)
- Academic Excellence** — School Topper in Class X (State Board); 94.2% in Class XII MPC.

LEADERSHIP & EXPERIENCE

- Campus Ambassador, E-Cell IIT Bombay** — Representing IIT Bombay's entrepreneurship cell and startup ecosystem on campus.
- Event Coordinator, IEEE SMC Society — Organised technical events and student innovation activities.
- Student Member — IEEE and IEEE SMC Society.

WHY SOFTWARE DEVELOPMENT

My hands-on work across the full MERN stack — React UIs, Express.js REST APIs, MongoDB data modelling — gives me a solid full-stack foundation. Through IIT Ropar's open-source internship I practised the complete delivery cycle: feature development, Git collaboration, code reviews, and shipping to a live production codebase. I write clean, maintainable JavaScript and am excited to join a team building meaningful software.
