

NIKHIL SAI KENGURI

Frontend / Full-Stack Developer (React & TypeScript) | AI-Assisted Engineering

+91 7386552846 | sainikhil1146@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-stack developer with hands-on React experience gained through a production internship at VLED Lab, IIT Ropar, building and shipping frontend features against a live, cross-functional codebase. Comfortable across the JavaScript/TypeScript stack (React, Node.js, Express, REST APIs) and has integrated AI capabilities directly into a shipped product by wiring the Google Gemini API into a full-stack platform. Works in Git-based collaborative workflows with code review and issue tracking, and applies AI-assisted tools to speed up coding, testing, and debugging. Looking for an early-career Software Engineering internship building production web applications with product and design teams.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design

Backend & APIs: Node.js, Express.js, REST API Design, Authentication, Flask

Databases: MongoDB, SQL, Data Modelling, Query Optimisation

AI-Assisted Development: Google Gemini API Integration, Prompt Engineering, AI-assisted coding/debugging workflows

Tools & Collaboration: Git, GitHub, VS Code, Postman, Vercel, Figma, Agile/SDLC

Core CS: Data Structures, Algorithms, OOP, Problem Solving

EXPERIENCE

Full-Stack Developer Intern — VLED Lab, IIT Ropar

Jun 2026 – Aug 2026

- Contributed to Ajarasakha, a farmer-friendly multilingual chat platform delivering instant, reliable answers to agricultural queries.
- Developed responsive React frontend components enabling users to submit questions in their native language.
- Implemented feature integrations with backend REST APIs, contributing to a live, actively-used codebase.
- Collaborated within a cross-functional engineering team using Git workflows, code review, and issue tracking.

PROJECTS

CrowdFAQ — Full-Stack Community Knowledge Platform — Solo Developer

Jun 2026 – Aug 2026

React/Vite · Node.js · Express.js · MongoDB · REST APIs · Google Gemini API

- Built a responsive full-stack MERN application independently, from database schema to deployed UI.
- Implemented secure authentication and REST API endpoints powering core platform features.
- Integrated the Google Gemini API to auto-summarise community discussions into concise takeaways, using AI directly as a product feature.
- Deployed and shipped the application end-to-end, handling hosting, environment configuration, and testing.

Smart Rehabilitation Crutch — Healthcare IoT System — Project Lead

Present

Arduino · Sensor Integration · Python/Flask · REST APIs · AI/IoT Workflow

- Designed the end-to-end solution architecture for an affordable post-injury rehabilitation device.
- Defined the AI/IoT data workflow linking sensor input to a companion mobile app; prototype in development ahead of IEEE EPICS funding evaluation.

EDUCATION

B.Tech, Computer Science (AI & ML) — Kalasalingam Academy of Research and Education

2024 – 2028

CGPA: 8.48 (4th Semester)

Intermediate (Class XII), MPC — Sri Chaitanya Junior College, Kurnool

2024

94.2%

LEADERSHIP & ACHIEVEMENTS

- Founding Campus Ambassador, E-Cell IIT Bombay (NEC) — established the chapter at KARE, representing 12,000+ students; leads outreach, recruitment, and awareness campaigns for national innovation programmes.
- IEEE & IEEE SMC Society — Core Member and Event Coordinator, co-organising technical workshops for 400+ members.
- Applied for IEEE EPICS International Student Project Funding with the Smart Rehabilitation Crutch (decision pending).
- Submitted the Smart Rehabilitation Crutch to Hackathon Innovative India 6.0 (MSME) as a healthcare IoT solution.
