Nikhil Sai Kenguri

Full-Stack Developer | React.js, Node.js, Express.js, MongoDB, JavaScript | UI/UX Designer | Open Source Contributor | AI & ML Student | Actively Seeking SDE/Frontend Internships
Greater Madurai Area

Summary

I'm a full-stack developer who'd rather ship something real than talk theory. Right now that means contributing to CrowdFAQ, a live MERN-stack (React, Node.js, Express, MongoDB) community platform, as part of my internship at VLED Lab, IIT Ropar — writing production code, working through real GitHub issues, and getting my commits reviewed by an established engineering team. Outside that, I'm building two things I actually care about: GridSense AI — a smart energy analytics platform Smart Crutch — an IoT-based rehabilitation device that tracks patient weight distribution in real time, with a live sensor dashboard (HTML/CSS/JS) and a Flask backend, aimed at making post-injury recovery tracking accessible and affordable like sitting at the intersection of design and engineering — I design interfaces in Figma before I ever open VS Code, because I think good software starts with understanding the user, not the stack. What I bring: # Hands-on MERN stack experience on a live, actively-used codebase # UI/UX design skills (Figma, wireframing, user-centered design) # A builder's mindset — I finish what I start, from prototype to deployment # Comfort working in open-source / collaborative dev environments (code review, issue tracking, git workflows) I'm a B.Tech CSE (AI & ML) student at Kalasalingam University (2024–2028), and I'm actively looking for Software Development / Frontend / Full-Stack internship opportunities where I can contribute from day one. If you're hiring for an internship or know a team that needs a fast-learning full-stack developer, let's talk — message me or check out my portfolio: nikhilsai-9.github.io/nikhilsaiportfolio/

Experience

E-Cell, IIT Bombay
Campus Ambassador
June 2026 - Present (3 months)

Mumbai

Selected as the founding Campus Ambassador to establish the E-Cell chapter at Kalasalingam Academy of Research and Education under IIT Bombay's National Entrepreneurship Challenge (NEC), representing a university of over 12,000 students.

- Building the E-Cell brand from the ground up by leading outreach initiatives, recruitment drives, and strategic campaigns to foster an entrepreneurial culture on campus.
- Driving student participation in national-level startup competitions, hackathons, and entrepreneurship programmes through targeted awareness and engagement campaigns.
- Organizing workshops, awareness sessions, and networking events to introduce students to entrepreneurship, innovation, and the startup ecosystem.
- Collaborating with IIT Bombay's E-Cell and a nationwide network of Campus Ambassadors to strengthen community engagement and support the successful establishment of the campus E-Cell.

bee skilled

Machine Learning & AI Intern
August 2026 - Present (1 month)

Selected for an online internship in Machine Learning & Artificial Intelligence, focused on gaining practical, hands-on industry experience through assigned projects and technical tasks.

- Working on assigned Machine Learning and AI projects under internship guidelines and deadlines.
- Applying theoretical concepts to practical problems through project-based learning and implementation.
- Developing practical understanding of AI/ML workflows, problem-solving, and project execution.
- Completing assigned deliverables while gaining exposure to real-world applications of Machine Learning and AI.

KARE IEEE SMC Society
Core Member & Student Member
July 2026 - August 2026 (2 months)
Tamil Nadu, India

- Serving as a Core Member of the KARE IEEE SMC Society, co-organizing technical workshops, innovation events, and professional development initiatives for approximately 400+ student members.
- Active IEEE Student Member since March 2026, contributing to IEEE technical communities by participating in workshops, seminars, networking events, and collaborative initiatives that promote innovation, research, and emerging technologies.

IEEE

Student Member

March 2026 - August 2026 (6 months)

India

IEEE

Vicharanashala (Lab for Education Design)

Full-Stack Developer Intern

June 2026 - July 2026 (2 months)

- Solo-designed and built CrowdFAQ, a full-stack MERN platform (React/Vite, Node.js, Express.js, MongoDB) enabling communities to crowdsource and share knowledge.
- Integrated Google Gemini AI to automatically summarize lengthy community discussions into concise, easy-to-read insights.
- Developed an embeddable CrowdFAQ widget for one-line integration into any website, along with a companion browser extension for cross-site access.
- Designed and implemented a contributor reputation system featuring tiered badges, ratings, and an interactive management dashboard.
- Owned the complete product lifecycle, including system architecture, frontend and backend development, API integration, testing, and deployment.
- Engineered a Locust-based load and SLA testing suite for the Node.js reviewer backend, simulating 50+ concurrent users across login, queue retrieval, and submission workflows.
- Built an automated SLA verification engine to validate 95th-percentile latency against defined thresholds, integrated with GitHub Actions CI to fail builds on performance regressions and generate HTML/CSV performance reports.
